Aim:

Write a program to print the [multiplication table] for a given number with the number of rows in the

Exp. Name: Write a Program to print Multiplication Table for a given number

For example, for a number (2) with (3) rows, the output should be:

```
2 * 1 = 2
2 * 2 = 4
2 * 3 = 6
```

At the time of execution, the program should print the following messages one by one on the console as:

```
Enter an integer number :
Enter number of rows:
```

For example, if the user gives the input as:

```
Enter an integer number : 5
Enter number of rows: 4
```

then the program should print the result as:

```
5 * 1 = 5
5 * 2 = 10
5 * 3 = 15
5 * 4 = 20
```

Source Code:

Program411.c

```
#include<stdio.h>
int main()
   int num,row,i;
   printf("Enter an integer number : ");
   scanf("%i",&num);
   printf("Enter number of rows : ");
   scanf("%i",&row);
   for(i=1;i<=row;i++)</pre>
      printf("%d * %d = %d\n",num,i,num*i);
   }
}
```
